

# KnowledgePresenter

## Develop accessible e-learning for all users.

*KnowledgePresenter® X contains a range of features that allow lessons to be created for all types of users and capabilities.*

Feature	Benefit
Flexible Course Creation	Because everything is customizable, not necessarily template based, you determine font sizes, colors and styles.
Include Multimedia	Audio and video can be optionally included to help the learning process and visually impaired. Effortlessly add audio/video to any learning process—and allow the user to hide/show audio as they wish.
Create Read Aloud Text	Automatically create text to computer generated audio to provide extra information, or better explanations. Audio can be made to play on mouseover, or when the user wants it to with a user controllable playbar.
User controllable text sizes	Create lessons and give the user the capability to increase or decrease the size of text.
Red Green Color Blind Approximation	View your lessons in a simulated fashion as they may be viewed by Red Green color blind individuals.
Grayscale View	View your lessons as they will appear on grayscale device, or when printed in black and white.
Tooltips	Alternate text (tooltips) available for all images and objects. These can be created manually, or automatically generated.
Printouts	All interactive material can be made available as printable material. Allow users to print all or part of lessons.
Generate PDF Documents	Generate PDF Documents that can be effortlessly linked to KnowledgePresenter lessons in a flash.
Global Keyboard Shortcuts	Global keyboard shortcuts available to navigate through a presentation or lesson.
Other Keyboard Shortcuts	Each event you create can have an alternate keyboard shortcut associated with it.
Feedback	Allows users to provide feedback if the lesson is played back via a Learning Management System.
Playback	Playback available on wide range of platforms and formats, including portable devices, and as movies.
Groups and Scenarios	Use groups and scenarios to create multiple versions of the same lessons—for different uses, different users, or different platforms.
Works with Accessibility Enabled Browsers	Run lessons exported from KnowledgePresenter in accessibility enabled browsers to enable text and object labels to be read along, such as with IBM Home Page Reader.
