

KnowledgePresenter

Import and Convert PowerPoint documents to create e-learning lessons. Retain editing ability, add interaction.

KnowledgePresenter® X Professional allows you to import PowerPoint presentations to create highly interactive, high quality, low bandwidth e-learning lessons or presentations.

Feature	Benefit
Import PowerPoint Presentations	Import PowerPoint presentations as images, or as fully editable slides.
Slideshows	Import PowerPoint presentations as Slideshows—with automatic navigation controls added, thumbnails for navigation, and streaming loaded—all in HTML.
Retain Editing Ability	All text from the PowerPoint slides can be edited with KnowledgePresenter Professional.
Maintain Timeline	Now you can even maintain timelines created in more recent versions of PowerPoint, where events on single slides are timed to take place at certain periods.
Low Bandwidth Results	Special compression techniques are used to create lessons and presentations that are much smaller and quicker to load than the original PowerPoint Presentations.
Include Notes	You can optionally include all notes created in the PowerPoint Presentation.
Allow user to Print Handouts	Include the ability for users to print handouts from your lesson or presentation much as they can from PowerPoint.
Automatically Generate Indexes	Indexes can automatically be generated from the imported PowerPoint Presentation.
Add your own Audio or Video	Add audio, video, or any other type of object to any slide or step.
Apply Transitions, Fades and Wipes	Apply transitions to any slide or object. Most transitions and other effects are included from original file.
Add Interaction	Turn a standard PowerPoint Presentation into a highly interactive assessment, presentation, or demonstration.
Add SCORM compliance	As with any KnowledgePresenter lesson or presentations, the results can be made fully SCORM compliant.
