

KnowledgePresenter

KP-Capture™.

Capture screen, movie, and resource images for documentation or software simulations.

Capture screen images for documentation or software simulations. Capture full screen, selected windows, or regions. Optionally include and edit mouse cursors, and edit at a later stage. Set mouseover and mousedown images for perfect software simulations.

Breaking News: The following features have now been added - export frames to Microsoft Word or Microsoft PowerPoint, capture images from movie files, capture images from web pages, capture bitmaps, icons and cursors from executable files, crop images, and add borders.

Feature	Benefit
Capture Screens	Capture whole screen, active window, selected window, or screen area.
Capture Options	Capture when certain key is pressed, when mouse is pressed, or at given intervals
Mouse Cursors	Capture mouse cursor position. After capture, you can adjust mouse cursor position and appearance
Capture Frame from Movies	Capture frames from AVI, MPG, WMV, ASF and some MOV movies.
Capture Images from Web Pages	List and capture images from a selected web page.
Capture resources from EXE files	Capture icons, bitmaps, and cursors from any EXE file.
Created Printed Documentation	Mark any frame as printable, and print directly from KP-Capture.
Frame Options	Edit Frames, duplicate, add and remove frames after capture.
Options	Crop images, and add borders. Reduce colors during export.
Export	Export captured images as images, a Word Document, PowerPoint presentation, or Animated GIF.
Screen Resolution	Automatically adjust screen resolution.
