

KnowledgePresenter

KP-DocumentaryMaker™. Turn your still images into compelling Flash videos.

Turn your still images into compelling videos - including fades, dramatic pan and zoom effects, custom timing, optionally added narration and/or a watermark, all in seconds. Add text, timings, transitions, and much more. You can even import your Microsoft PowerPoint presentations, and add narration and effects. Export as a Flash file for standalone playback or integration with KnowledgePresenter. Export as EXE file for standalone local playback.

Feature	Benefit
Import Images	Load Images, paste from the Clipboard, grab images from Movie Files.
Adjust Timing and Position	Adjust timing for each photograph. Adjust photo position using the filmstrip.
Animations and Transitions	Select animation and movement settings for each photo.
Pan And Zoom	Create start and end views for dramatic pan and zoom effects.
Watermarks	Optionally add a watermark, and adjust its position and opacity for a professional touch.
Text Boxes	Add high quality text boxes on any frame.
Title Pages	Add a title page to your movie.
Text-to-Speech	Use the Text-to-Speech engine to create audio from text
Apply Effects	Optimize images, or add effects like sepia, grayscale, or shaky-cam.
Watermarks	Add images, logos and watermarks to any frame, or the entire movie.
Resize	Set the canvas size to any size you wish.
PowerPoint Import	Import PowerPoint presentations.
Add Audio	Add audio on a frame by frame basis, or over the entire movie. Optionally add a background movie track.
Export Options	Determine whether playbar is included in exported movie, set size, auto restart, auto play, and quality options for images and audio. Export as EXE for standalone local playback.
Integrate with KnowledgePresenter	Integrate your presentations in KnowledgePresenter lessons, or play them standalone.
Customizable Playbars	Customize the Flash playbar with your own graphics, or select from one of the provided playbars.
Spell Checker and Thesaurus	Proof and correct your work directly in KP-DocumentaryMaker.
Set Background Images	Select a background image for your presentation, or for title pages. Determine whether previous images stay on screen, or are removed.
SCORM Compliant	Create SCORM compliant HTML pages to use your movies in a Learning Management System.
