

The Australian Green Tree Frog

A multimedia study.

Green tree frogs are found across the northern and eastern parts of Australia. These are a common frog, and one of Australia's largest.

Green Tree Frogs can grow up to more than 100mm (4 inches) in length.

The Dwarf Green Tree Frog is found in many of the same areas as its larger brother.

As is the Dainty Green Tree Frog.

And Peron's Tree Frog.
